

# ING

## About ING

We envision a world where living a healthy lifestyle is not the privilege of the fortune, but a passion for every individual. ING is an early startup created to connect people and society to achieve a healthy lifestyle. We believe that every step that we take is a step closer to achieving greatness, so our mission is to help one learn the habit of consistent effort and the importance of having a healthy diet.

## Software Engineer – Mobile Development

We are looking for a passionate software engineer to help build a mobile application that connects users and businesses together to promote a healthy lifestyle as a society. You will be part of a highly focused team, which moves in a fast-paced and iterative manner. Your excellent implementation skill will be highly valued, and your communication skill will help facilitate collaborations with your fellow team members.

### Responsibilities

- You are responsible to gather requirements for each feature, come up with a design, and implement it at the end.
- You are also responsible to test your code thoroughly via unit tests and manual tests

### Basic Requirements

- Experience in mobile development (iOS and/or Android) and preferably React Native
- Ability to pick up new tools as see fit in the project.
- Strong sense of ownership and drive
- Bachelor's degree in Computer Science or related field is preferred but not required

### Preferred Requirements

- Experience with version control like git
- Experience with NoSQL / relational database
- Experience in Firebase and Node.js
